Duropower	DXE454HO5	IS	OK
Duropower	DXE454HO5	IS	OK
Ballastwise	DXE454HO5	IS	OK

Important Notice

This ballast compatibility list is for reference when choosing a ballast and lamp combination. The list above features Instant Start (IS) and Programmed Start (PS) ballasts tested for compatibility with the aforementioned lamps. While each ballast model listed has been tested, some ballasts may have been revised which may change operating parameters and impact lamp performance. Applications and conditions are variable so users should make their own determinations as to the suitability of a lamp-ballast combination for their own specific application and use. Compatibility may also extend to ballasts not included on this list and Active Grow recommends testing a few fixtures with the lamps to determine compatibility for the users particular application.

This list is current as of February 2019. We are constantly testing for compatible ballasts. Please check back for the latest updates to this list online at www.activegrowled.com.
